Press Release of Equinix, Inc. dated April 26, 2017.

Equinix Reports First Quarter 2017 Results

Interconnection and Data Center Leader Delivers 57th Consecutive Quarter of Revenue Growth; Quarterly Revenues Increase 12% Year-over-Year to \$950 million

REDWOOD CITY, Calif., April 26, 2017 /PRNewswire/ --

- Record quarterly bookings in Europe and the network vertical
- Added 11 Fortune 500 customers including Progressive Corporation and Eli Lilly and Company
- Customer deployments across multiple metros increase to 83% of total recurring revenue, demonstrating the value of Equinix's global platform

Equinix, Inc. (Nasdaq: EQIX), the global interconnection and data center company, today reported quarterly results for the quarter ended March 31, 2017. Equinix uses certain non-GAAP financial measures, which are described further below and reconciled to the most comparable GAAP financial measures after the presentation of our GAAP financial statements.

First Quarter 2017 Results Summary

- **Revenues from continuing operations**
 - \$950 million, a 1% increase over the previous quarter
- **Operating Income**
 - \$167 million, a 9% decrease from the previous quarter
- **Adjusted EBITDA**
 - \$428 million, a 45% adjusted EBITDA margin
 - Includes \$12 million of integration costs
- **Net Income from Continuing Operations**
 - \$42 million
- **AFFO**
 - \$304 million, a 4% increase over the previous quarter

2017 Annual Guidance Summary

- **Revenues from continuing operations**
 - >\$3,976 million, a 10.1% increase over the previous year; a normalized and constant currency growth rate of greater than 11.1%
- **Adjusted EBITDA**
 - >\$1,860 million or a 46.8% adjusted EBITDA margin
 - Assumes \$30 million of integration costs for acquisitions
- **AFFO**
 - >\$1,214 million, a 13% increase over the previous year
 - Assumes \$30 million of integration costs for acquisitions
 - Assumes \$87 million of incremental interest expense attributed to the Verizon data center acquisition funding

Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income (loss) from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant.

Quote

Steve Smith, President and CEO, Equinix:

"Equinix is off to a strong start in 2017 with our 57th quarter of consecutive revenue growth and continued momentum in capturing and curating powerful digital ecosystems at global scale. We are adding new enterprises at a solid pace, as enterprises adopt hybrid and multi-cloud as their IT architecture of choice. We have also made great progress towards our \$3.6 billion acquisition of the portfolio of 29 data centers from Verizon in the U.S. and Latin America, and we remain highly confident that this transaction will create significant value for both our customers and our shareholders, strengthening our global platform and delivering AFFO per share accretion on day one, excluding transaction and integration costs."

Business Highlights

- As Equinix expects to complete the transaction to acquire 29 data centers from Verizon in Q2, it also continues to invest in organic expansion, with 20 announced expansion projects currently underway. In Q1, Equinix opened a new IBX data center in São Paulo, Brazil (SP3), and today Equinix announced new expansions in London, Paris and Sydney totaling \$145 million of capital expenditures. The global reach of Equinix continues to attract companies seeking to interconnect their IT infrastructure closer to the digital edge, and in Q1 customer deployments across multiple metros of Platform Equinix™ increased to 83% of total recurring revenue.
- The enterprise vertical remained the fastest growing, with recurring revenue surpassing \$100 million in Q1, as enterprises re-architect their infrastructure to directly and securely interconnect their people, locations, clouds and data at the digital edge. Q1 was also a record quarter in terms of new enterprise wins, and customer wins included 11 Fortune 500 customers, among them Progressive Corporation, one of the largest providers of car insurance in the United States, and Eli Lilly and Company, a global pharmaceutical company.
- Equinix continues to deliver strong results in the network vertical with record bookings led by the major telecommunication providers which are expanding capacity and capabilities for digital services such as OTT, cloud and security, as well as refreshing deployments with upgraded optical technologies. Network customer expansions in Q1 included a top tier global provider building out its new digital services, and a global carrier that is making major investments in EMEA for their core backbone network.
- Building on a foundation of innovative solutions for customers, Equinix launched IBX SmartView™ in Q1. This new data center monitoring software platform provides unprecedented visibility into distributed infrastructure for enterprises moving their IT operations to the digital edge. It enables precise and real-time monitoring and forecasting of power, mechanical and environmental conditions across a customer's global footprint across Platform Equinix.

Business Outlook

For the second quarter of 2017, the Company expects revenues to range between \$976 and \$982 million, an increase of 3.1% quarter over quarter at the midpoint, or a normalized and constant currency growth rate of 2.6%. This guidance includes a foreign currency benefit of \$5 million when compared to the average FX rates in Q1 2017. Cash gross margins are expected to approximate 67-68%. Cash selling, general and administrative expenses are expected to range between \$206 and \$212 million. Adjusted EBITDA is expected to range between \$447 and \$453 million, which includes a \$4 million foreign currency benefit when compared to the average FX rates in Q1 2017 and \$10 million of integration costs from the Telecity and Bit-Isle acquisitions. Capital expenditures are expected to range between \$331 and \$351 million, which includes approximately \$41 million of recurring capital expenditures.

For the full year of 2017, total revenues are expected to be greater than \$3,976 million, an increase of 10.1% year over year, or a normalized and constant

currency growth rate of greater than 11.1%. This guidance includes a foreign currency benefit of \$40 million when compared to prior Equinix guidance rates, and has been normalized for the Telecity January 15th close impact and other acquisition related activities. Total year cash gross margins are expected to approximate 67-68%. Cash selling, general and administrative expenses are expected to range between \$810 and \$830 million. Adjusted EBITDA is expected to be greater than \$1,860 million, an increase of 12.2% year over year, or a normalized and constant currency growth rate of greater than 11.3%. This guidance includes \$14 million of foreign currency benefit on adjusted EBITDA when compared to prior Equinix guidance rates and an expected \$30 million in integration costs. AFFO is expected to be greater than \$1,214 million, including \$87 million in interest expense related to the pending Verizon data center acquisition, but does not yet include the operating results attributed to the acquisition. Capital expenditures are expected to range between \$1,100 and \$1,200 million, including approximately \$160 and \$165 million of recurring capital expenditures and \$940 and \$1,035 million of non-recurring capital expenditures.

The U.S. dollar exchange rates used for 2017 guidance, taking into consideration the impact of our foreign currency hedges, have been updated to \$1.09 to the Euro, \$1.40 to the Pound, S\$1.40 to the U.S. dollar, ¥111.11 to the U.S. dollar and R\$3.13 to the U.S. dollar. The 2017 global revenue breakdown by currency for the Euro, Pound, Singapore Dollar, Japanese Yen and Brazilian Real is 19%, 10%, 7%, 7% and 3%, respectively.

The adjusted EBITDA guidance is based on the revenue guidance less our expectations of cash cost of revenues and cash operating expenses. The AFFO guidance is based on the adjusted EBITDA guidance less our expectations of net interest expense, an installation revenue adjustment, a straight-line rent expense adjustment, amortization of deferred financing costs, gains (losses) on debt extinguishment, an income tax expense adjustment, recurring capital expenditures and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items.

Q1 2017 Results Conference Call and Replay Information

About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 41 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

Non-GAAP Financial Measures

Equinix provides all information required in accordance with generally accepted accounting principles ("GAAP"), but it believes that evaluating its ongoing operating results may be difficult if limited to reviewing only GAAP financial measures. Accordingly, Equinix uses non-GAAP financial measures to evaluate its operations.

Equinix provides normalized and constant currency growth rates, which are calculated to adjust for acquisitions, dispositions, integration costs and foreign currency.

Equinix presents adjusted EBITDA, which is a non-GAAP financial measure. Adjusted EBITDA represents income or loss from operations plus depreciation, amortization, accretion, stock-based compensation expense, restructuring charges, impairment charges, acquisition costs and gains on asset sales.

In presenting non-GAAP financial measures, such as adjusted EBITDA, cash cost of revenues, cash gross margins, cash operating expenses (also known as cash selling, general and administrative expenses or cash SG&A), adjusted EBITDA margins, free cash flow and adjusted free cash flow, Equinix excludes certain items that it believes are not good indicators of Equinix's current or future operating performance. These items are depreciation, amortization, accretion of asset retirement obligations and accrued restructuring charges, stock-based compensation, restructuring charges, impairment charges, acquisition costs and gains on asset sales. Equinix excludes these items in order for its lenders, investors and the industry analysts who review and report on Equinix to better evaluate Equinix's operating performance and cash spending levels relative to its industry sector and competitors.

Equinix excludes depreciation expense as these charges primarily relate to the initial construction costs of an IBX center, and do not reflect its current or future cash spending levels to support its business. Its IBX centers are long-lived assets, and have an economic life greater than 10 years. The construction costs of an IBX center do not recur with respect to such data center, although Equinix may incur initial construction costs in future periods with respect to additional IBX centers, and future capital expenditures remain minor relative to the initial investment. This is a trend it expects to continue. In addition, depreciation is also based on the estimated useful lives of the IBX centers. These estimates could vary from actual performance of the asset, are based on historic costs incurred to build out our IBX centers and are not indicative of current or expected future capital expenditures. Therefore, Equinix excludes depreciation from its operating results when evaluating its operations.

In addition, in presenting the non-GAAP financial measures, Equinix also excludes amortization expense related to acquired intangible assets. Amortization expense is significantly affected by the timing and magnitude of acquisitions and these charges may vary in amount from period to period. We exclude amortization expense to facilitate a more meaningful evaluation of our current operating performance and comparisons to our prior periods. Equinix excludes accretion expense, both as it relates to its asset retirement obligations as well as its accrued restructuring charges, as these expenses represent costs which Equinix also believes are not meaningful in evaluating Equinix's current operations. Equinix excludes stock-based compensation expense, as it can vary significantly from period to period based on share price, the timing, size and nature of equity awards. As such, Equinix and many investors and analysts, exclude this stock-based compensation expense to compare its operating results with those of other companies. Equinix excludes restructuring charges from its non-GAAP financial measures. The restructuring charges relate to Equinix's decision to exit leases for excess space adjacent to several of its IBX centers, which it did not intend to build out, or its decision to reverse such restructuring charges. Equinix also excludes impairment charges related to certain long-lived assets. The impairment charges are related to expense recognized whenever events or changes in circumstances indicate that the carrying amount of long-lived assets are not recoverable. Equinix also excludes gains on asset sales as it represents profit that is not meaningful in evaluating the current or future operating performance. Finally, Equinix excludes acquisition costs from its non-GAAP financial measures to allow more comparable comparisons of the financial results to the historical operations. The acquisition costs relate to costs Equinix incurs in connection with business combinations. Such charges generally are not relevant to assessing the long-term performance of Equinix. In addition, the frequency and amount of such charges vary significantly based on the size and timing of the acquisitions. Management believes items such as restructuring charges, impairment charges, acquisition costs and gains on asset sales are non-core transactions; however, these types of costs may occur in future periods.

Equinix also presents funds from operations ("FFO") and adjusted funds from operations ("AFFO"), which are non-GAAP financial measures commonly used in the REIT industry. FFO is calculated in accordance with the definition established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income (loss), excluding gains (losses) from the disposition of real estate assets, depreciation and amortization on real estate assets and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items. AFFO represents FFO, excluding depreciation and amortization expense on non-real estate assets, accretion, stock-based compensation, restructuring charges, impairment charges, acquisition costs, an installation revenue adjustment, a straight-line rent expense adjustment, amortization of deferred financing costs, gains (losses) on debt extinguishment, an income tax expense adjustment, recurring capital expenditures, net income (loss) from discontinued operations, net of tax and adjustments from FFO to AFFO for unconsolidated joint ventures' and non-controlling interests' share of these items. Equinix excludes depreciation expense, amortization expense, accretion, stock-based compensation, restructuring charges, impairment charges and acquisition costs for the same reasons that they are excluded from the other non-GAAP financial measures mentioned above.

Equinix includes an adjustment for revenue from installation fees, since installation fees are deferred and recognized ratably over the expected life of the installation, although the fees are generally paid in a lump sum upon installation. Equinix includes an adjustment for straight-line rent expense on its operating leases, since the total minimum lease payments are recognized ratably over the lease term, although the lease payments generally increase over the lease term. The adjustments for both installation revenue and straight-line rent expense are intended to isolate the cash activity included within the straight-lined or amortized results in the consolidated statement of operations. Equinix excludes the amortization of deferred financing costs as these expenses relate to the initial costs incurred in connection with its debt financings that have no current or future cash obligations. Equinix excludes gains (losses) on debt extinguishment since it represents a cost that is not a good indicator of Equinix's current or future operating performance. Equinix includes an income tax expense adjustment, which represents the non-cash tax impact due to changes in valuation allowances and uncertain tax positions that do not relate to the current period's operations. Equinix excludes recurring capital expenditures, which represent expenditures to extend the useful life of its IBX centers or other assets that are required to support current revenues. Equinix also excludes net income (loss) from discontinued operations, net of tax, which represents results that are not a good indicator of our current or future operating performance.

Equinix presents constant currency results of operations, which is a non-GAAP financial measure and is not meant to be considered in isolation or as an alternative to GAAP results of operations. However, Equinix has presented this non-GAAP financial measure to provide investors with an additional tool to evaluate its operating results without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of Equinix's business performance. To present this information, Equinix's current and comparative prior period revenues and certain operating expenses from entities with functional currencies other than the U.S. dollar are converted into U.S. dollars at a consistent exchange rate for purposes of each result being compared.

Non-GAAP financial measures are not a substitute for financial information prepared in accordance with GAAP. Non-GAAP financial measures should not be considered in isolation, but should be considered together with the most directly comparable GAAP financial measures and the reconciliation of the non-GAAP financial measures to the most directly comparable GAAP financials measures. Equinix presents such non-GAAP financial measures to provide investors with an additional tool to evaluate its operating results in a manner that focuses on what management believes to be its core, ongoing business operations. Management believes that the inclusion of these non-GAAP financial measures provides consistency and comparability with past reports and provides a better understanding of the overall performance of the business and its ability to perform in subsequent periods. Equinix believes that if it did not provide such non-GAAP financial information, investors would not have all the necessary data to analyze Equinix effectively.

Investors should note that the non-GAAP financial measures used by Equinix may not be the same non-GAAP financial measures, and may not be calculated in the same manner, as those of other companies. Investors should, therefore, exercise caution when comparing non-GAAP financial measures used by us to similarly titled non-GAAP financial measures of other companies. Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income (loss) from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant. Equinix intends to calculate the various non-GAAP financial measures in future periods consistent with how they were calculated for the periods presented within this press release.

Forward Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, the challenges of acquiring, operating and constructing IBX data centers and developing, deploying and delivering Equinix services; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenue from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; and other risks described from time to time in Equinix's filings with the Securities and Exchange Commission. In particular, see Equinix's recent quarterly and annual reports filed with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
