Item 2.02. Results of Operations and Financial Condition

On February 13, 2019, Equinix, Inc. ("Equinix") issued a press release and will hold a conference call regarding its financial results for the fourth quarter and full year ended December 31, 2018. A copy of the press release is furnished as Exhibit 99.1 to this report.

This information shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Equinix is making reference to certain non-GAAP financial information in both the press release and the conference call. A reconciliation of these non-GAAP financial measures to the comparable GAAP financial measures is contained in the attached press release.

Item 9.01. Financial Statements and Exhibits

99.1 Press Release of Equinix, Inc. dated February 13, 2019.

Equinix Reports Fourth Quarter And Full Year 2018 Results

Interconnection and Data Center Leader Delivers 64th Consecutive Quarter of Revenue Growth

REDWOOD CITY, Calif., Feb. 13, 2019 /PRNewswire/ --

- Delivered 2018 annual revenues of \$5.072 billion, an increase of 16% year-over-year; 9% growth on a normalized and constant currency basis
- · Achieved record global gross and net bookings in the quarter
- 36 expansion projects underway and three new markets added including Hamburg, Muscat and Seoul
- Continued to scale its global interconnection platform adding an incremental 8,800 interconnections, including 1,800 virtual connections through ECX Fabric™

Equinix, Inc. (Nasdaq: EQIX), the global interconnection and data center company, today reported results for the quarter and the year ended December 31, 2018. Equinix uses certain non-GAAP financial measures, which are described further below and reconciled to the most comparable GAAP financial measures after the presentation of our GAAP financial statements.

2018 Results Summary

- Revenues
 - \$5.072 billion, a 16% increase over the previous year or a normalized and constant currency increase of 9%
- Operating Income
 - \$977 million, a 21% increase over the previous year
- Adjusted EBITDA
 - \$2.413 billion, a 48% adjusted EBITDA margin
 - Includes \$31 million of integration costs
- Net Income
 - \$365 million, a 57% increase over the previous year
- AFFO
 - \$1.659 billion, a 15% increase over the previous year
 - Includes \$31 million of integration costs

2019 Annual Guidance Summary

- Revenues
 - \$5.520 \$5.570 billion, a 9 10% increase over the previous year
- Adjusted EBITDA
 - \$2.605 \$2.655 billion, a 47% adjusted EBITDA margin
 - Assumes \$15 million of integration costs
 - Assumes negative \$15 million impact from the adoption of ASC 842
- AFFO
 - \$1.825 \$1.875 billion, a 10 13% increase over the previous year
 - Assumes \$15 million of integration costs
 - Assumes immaterial impact from the adoption of ASC 842

Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income (loss) from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant.

Quote

Charles Meyers, President and CEO, Equinix:

"In addition to strong financial performance, we continue to build on our market leadership and cement our position as the trusted center of a cloud-first world. Our reach, scale and innovative product portfolio puts us in a great position to build on our business model that is substantially and durably differentiated from our peers. The market remains in the early innings of the digital transformation journey and our accelerating ability to both land and expand customers on that journey, makes us confident that we are playing the best hand in the business. We continue to have a clear view of our strategy and the opportunities ahead, and we are looking forward to another successful year."

Business Highlights

- Equinix continues to expand the reach of its global platform through organic expansion with 36 projects across 25 markets underway, including
 expansions in three new markets Hamburg, Muscat and Seoul. Today, Equinix announced new expansions in the Chicago, Dallas, Hong Kong,
 Melbourne, New York, Paris, São Paulo, Singapore, Tokyo and Zurich metros.
- Equinix had very strong bookings across all three regions (Americas, EMEA and Asia-Pacific) in Q4, with record EMEA bookings, and the second-best booking performance to date in the Americas and Asia-Pacific regions. Equinix bookings this quarter spanned across more than 3,000 customers, with a quarter of those customers buying across multiple metros, highlighting the unique diversity of Equinix's retail colocation business.
- Enterprises continue to leverage Equinix's highly distributed and cloud-enabled global platform to locate their infrastructure closer to the interconnected digital edge. In Q4, 60% of total recurring revenues came from customers deployed across all three regions, and 86% of total recurring revenues came from customers deployed across multiple metros.
- Interconnection revenues continued to outpace colocation revenues in Q4, growing 10% year-over-year on an as-reported basis and 12% on a
 normalized and constant currency basis. Today, Equinix has the most comprehensive global interconnection platform now comprising over 333,000
 physical and virtual interconnections more than four times the interconnections of any competitor. In Q4, Equinix added an incremental 8,800
 interconnections, including 1.800 virtual connections through Equinix Cloud Exchange Fabric™ (ECX Fabric™).
- Equinix channel sales delivered greater than 20% of the bookings for the third consecutive quarter. This accounted for half of the new logos acquired in the quarter, driven by solid performance across all regions and all partner types. In 2018, the channel delivered over 4,000 unique deals, a strong indication of the significant velocity derived from Equinix's retail selling engine.
- indication of the significant velocity derived from Equinix's retail selling engine.

 Equinix achieved a record number of new wins across multiple verticals in Q4. The content and digital media vertical experienced record bookings with meaningful customer expansions including Fastly, Roblox and Tencent. The Cloud and IT vertical also delivered record bookings. Expansions included StackPath, a leading provider of edge cloud security services deploying infrastructure across 21 metros. The enterprise vertical continues to be our fastest-growing segment, led by energy, healthcare and retail sub-segments, as digital transformation forces firms to change how they interconnect users and clouds across multiple locations. Equinix has now captured 48% of the Fortune 500, and one-third of the Forbes Global 2000 companies.

Equinix adopted FASB Accounting Standard Codification Topic 842, Leases ("ASC 842") effective January 1, 2019. The expected impact of adoption is included in the provided guidance.

For the first quarter of 2019, Equinix expects revenues to range between \$1.342 and \$1.352 billion, an increase of 3% quarter-over-quarter at the midpoint, on an as-reported basis, and 2% on a normalized and constant currency basis, the largest ever quarterly step-up in recurring revenues. This guidance includes a positive foreign currency benefit of \$8 million when compared to the average FX rates in Q4 2018. Adjusted EBITDA is expected to range between \$624 and \$634 million, which includes a \$4 million positive foreign currency benefit when compared to the average FX rates in Q4 2018. Adjusted EBITDA includes \$15 million of Q1 seasonal costs, a negative \$4 million impact from the adoption of ASC 842, and \$5 million of integration costs related to prior acquisitions. Recurring capital expenditures are expected to range between \$20 and \$30 million.

For the full year of 2019, total revenues are expected to range between \$5.520 and \$5.570 billion, a 9 - 10% increase over the previous year or a normalized and constant currency increase of 8 - 9%. This guidance includes a positive foreign currency benefit of \$10 million when compared to prior Equinix guidance rates. Adjusted EBITDA is expected to range between \$2.605 and \$2.655 billion, an adjusted EBITDA margin of 47%. This adjusted EBITDA includes a foreign currency benefit of \$3 million when compared to prior Equinix guidance rates, a negative \$15 million impact from the adoption of ASC 842, \$15 million in integration costs related to prior acquisitions, higher EMEA utilities expense and record levels of expansion activities. AFFO is expected to range between \$1.825 and \$1.875 billion, an increase of 10 - 13% year-over-year on both an as-reported and a normalized and constant currency basis. This AFFO guidance includes a foreign currency benefit of \$5 million when compared to prior Equinix guidance rates, \$15 million in integration costs related to prior acquisitions, and assumes an immaterial impact from the adoption of ASC 842. Non-recurring capital expenditures are expected to range between \$1.725 and \$185 million.

The U.S. dollar exchange rates used for 2019 guidance, taking into consideration the impact of our current foreign currency hedges, have been updated to \$1.16 to the Euro, \$1.32 to the Pound, ¥110 to the U.S. dollar, S\$1.36 to the U.S. dollar, and R\$3.88 to the U.S. dollar. The Q4 2018 global revenue breakdown by currency for the Euro, British Pound, Japanese Yen, Singapore Dollar and Brazilian Real is 19%, 9%, 6%, 6% and 3%, respectively.

The adjusted EBITDA guidance is based on the revenue guidance less our expectations of cash cost of revenues and cash operating expenses. The AFFO guidance is based on the adjusted EBITDA guidance less our expectations of net interest expense, an installation revenue adjustment, a straight-line rent expense adjustment, a contract cost adjustment, amortization of deferred financing costs and debt discounts and premiums, income tax expense, an income tax expense adjustment, recurring capital expenditures, other income (expense), (gains) losses on disposition of real estate property and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items.

Q4 2018 Results Conference Call and Replay Information

Equinix will discuss its quarterly results for the period ended December 31, 2018, along with its future outlook, in its quarterly conference call on Wednesday, February 13, 2019, at 5:30 p.m. ET (2:30 p.m. PT). A simultaneous live webcast of the call will be available on the Company's Investor Relations website at www.equinix.com/investors. To hear the conference call live, please dial 1-517-308-9482 (domestic and international) and reference the passcode EQIX.

A replay of the call will be available one hour after the call, through Wednesday, May 1, 2019, by dialing 1-203-369-0224 and entering passcode (2019). In addition, the webcast will be available on the company's website at www.equinix.com/investors (no password required).

Investor Presentation and Supplemental Financial Information

Equinix has made available on its website a presentation designed to accompany the discussion of Equinix's results and future outlook, along with certain supplemental financial information and other data. Interested parties may access this information through the Equinix Investor Relations website at www.equinix.com/investors.

About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most-interconnected data centers. In 52 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

Non-GAAP Financial Measures

Equinix provides all information required in accordance with generally accepted accounting principles ("GAAP"), but it believes that evaluating its ongoing operating results may be difficult if limited to reviewing only GAAP financial measures. Accordingly, Equinix uses non-GAAP financial measures to evaluate its operations.

Equinix provides normalized and constant currency growth rates, which are calculated to adjust for acquisitions, dispositions, integration costs, changes in accounting principles and foreign currency.

Equinix presents adjusted EBITDA, which is a non-GAAP financial measure. Adjusted EBITDA represents income or loss from operations excluding depreciation, amortization, accretion, stock-based compensation expense, restructuring charges, impairment charges, acquisition costs and gain or loss on asset sales.

In presenting non-GAAP financial measures, such as adjusted EBITDA, cash cost of revenues, cash gross margins, cash operating expenses (also known as cash selling, general and administrative expenses or cash SG&A), adjusted EBITDA margins, free cash flow and adjusted free cash flow, Equinix excludes certain items that it believes are not good indicators of Equinix's current or future operating performance. These items are depreciation, amortization, accretion of asset retirement obligations and accrued restructuring charges, stock-based compensation, restructuring charges, impairment charges, acquisition costs and gain or loss on asset sales. Equinix excludes these items in order for its lenders, investors and the industry analysts who review and report on Equinix to better evaluate Equinix's operating performance and cash spending levels relative to its industry sector and competitors.

Equinix excludes depreciation expense as these charges primarily relate to the initial construction costs of an IBX data center, and do not reflect its current or future cash spending levels to support its business. Its IBX data centers are long-lived assets, and have an economic life greater than 10 years. The construction costs of an IBX data center do not recur with respect to such data center, although Equinix may incur initial construction costs in future periods with respect to additional IBX data centers, and future capital expenditures remain minor relative to the initial investment. This is a trend it expects to continue. In addition, depreciation is also based on the estimated useful lives of the IBX data centers. These estimates could vary from actual performance of the asset, are based on historic costs incurred to build out our IBX data centers and are not indicative of current or expected future capital expenditures. Therefore, Equinix excludes depreciation from its operating results when evaluating its operations.

In addition, in presenting the non-GAAP financial measures, Equinix also excludes amortization expense related to acquired intangible assets. Amortization expense is significantly affected by the timing and magnitude of acquisitions and these charges may vary in amount from period to period. We exclude amortization expense to facilitate a more meaningful evaluation of our current operating performance and comparisons to our prior periods. Equinix excludes

accretion expense, both as it relates to its asset retirement obligations as well as its accrued restructuring charges, as these expenses represent costs which Equinix also believes are not meaningful in evaluating Equinix's current operations. Equinix excludes stock-based compensation expense, as it can vary significantly from period to period based on share price and the timing, size and nature of equity awards. As such, Equinix and many investors and analysts exclude stock-based compensation expense to compare its operating results with those of other companies. Equinix excludes restructuring charges from its non-GAAP financial measures. The restructuring charges relate to Equinix's decision to exit leases for excess space adjacent to several of its IBX data centers, which it did not intend to build out, or its decision to reverse such restructuring charges. Equinix also excludes impairment charges related to certain long-lived assets. The impairment charges are related to expense recognized whenever events or changes in circumstances indicate that the carrying amount of long-lived assets are not recoverable. Equinix also excludes gain or loss on asset sales as it represents profit or loss that is not meaningful in evaluating the current or future operating performance. Finally, Equinix excludes acquisition costs from its non-GAAP financial measures to allow more comparable comparisons of the financial results to the historical operations. The acquisition costs relate to costs Equinix incurs in connection with business combinations. Such charges generally are not relevant to assessing the long-term performance of Equinix. In addition, the frequency and amount of such charges vary significantly based on the size and timing of the acquisitions. Management believes items such as restructuring charges, impairment charges, acquisition costs and gain or loss on asset sales are non-core transactions; however, these types of costs may occur in future periods.

Equinix also presents funds from operations ("FFO") and adjusted funds from operations ("AFFO"), which are non-GAAP financial measures commonly used in the REIT industry. FFO is calculated in accordance with the definition established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income or loss, excluding gain or loss from the disposition of real estate assets, depreciation and amortization on real estate assets and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items. AFFO represents FFO, excluding depreciation and amortization expense on non-real estate assets, accretion, stock-based compensation, restructuring charges, impairment charges, acquisition costs, an installation revenue adjustment, a straight-line rent expense adjustment, a contract cost adjustment, amortization of deferred financing costs and debt discounts and premiums, gain or loss on debt extinguishment, an income tax expense adjustment, recurring capital expenditures, net income or loss from discontinued operations, net of tax and adjustments from FFO to AFFO for unconsolidated joint ventures' and non-controlling interests' share of these items. Equinix excludes depreciation expense, amortization expense, accretion, stock-based compensation, restructuring charges, impairment charges and acquisition costs for the same reasons that they are excluded from the other non-GAAP financial measures mentioned above.

Equinix includes an adjustment for revenues from installation fees, since installation fees are deferred and recognized ratably over the period of contract term, although the fees are generally paid in a lump sum upon installation. Equinix includes an adjustment for straight-line rent expense on its operating leases, since the total minimum lease payments are recognized ratably over the lease term, although the lease payments generally increase over the lease term. Equinix also includes an adjustment to contract costs incurred to obtain contracts, since contract costs are capitalized and amortized over the estimated period of benefit on a straight-line basis, although costs of obtaining contracts are generally incurred and paid during the period of obtaining the contracts. The adjustments for installation revenues, straight-line rent expense and contract costs are intended to isolate the cash activity included within the straight-lined or amortized results in the consolidated statement of operations. Equinix excludes the amortization of deferred financing costs and debt discounts and premiums as these expenses relate to the initial costs incurred in connection with its debt financings that have no current or future cash obligations. Equinix excludes gain or loss on debt extinguishment since it represents a cost that is not a good indicator of Equinix's current or future operating performance. Equinix includes an income tax expense adjustment, which represents the non-cash tax impact due to changes in valuation allowances and uncertain tax positions that do not relate to the current period's operations. Equinix excludes recurring capital expenditures, which represent expenditures to extend the useful life of its IBX data centers or other assets that are required to support current or future operating performance.

Equinix presents constant currency results of operations, which is a non-GAAP financial measure and is not meant to be considered in isolation or as an alternative to GAAP results of operations. However, Equinix has presented this non-GAAP financial measure to provide investors with an additional tool to evaluate its operating results without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of Equinix's business performance. To present this information, Equinix's current and comparative prior period revenues and certain operating expenses from entities with functional currencies other than the U.S. dollar are converted into U.S. dollars at a consistent exchange rate for purposes of each result being compared.

Non-GAAP financial measures are not a substitute for financial information prepared in accordance with GAAP. Non-GAAP financial measures should not be considered in isolation, but should be considered together with the most directly comparable GAAP financial measures and the reconciliation of the non-GAAP financial measures to the most directly comparable GAAP financial measures. Equinix presents such non-GAAP financial measures to provide investors with an additional tool to evaluate its operating results in a manner that focuses on what management believes to be its core, ongoing business operations. Management believes that the inclusion of these non-GAAP financial measures provides consistency and comparability with past reports and provides a better understanding of the overall performance of the business and its ability to perform in subsequent periods. Equinix believes that if it did not provide such non-GAAP financial information, investors would not have all the necessary data to analyze Equinix effectively.

Investors should note that the non-GAAP financial measures used by Equinix may not be the same non-GAAP financial measures, and may not be calculated in the same manner, as those of other companies. Investors should, therefore, exercise caution when comparing non-GAAP financial measures used by us to similarly titled non-GAAP financial measures of other companies. Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income or loss from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant. Equinix intends to calculate the various non-GAAP financial measures in future periods consistent with how they were calculated for the periods presented within this press release.

Forward-Looking Statements

Recurring revenues

Non-recurring revenues

Revenues

This press release contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, the challenges of acquiring, operating and constructing IBX data centers and developing, deploying and delivering Equinix products and solutions; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenues from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; risks related to our taxation as a REIT; and other risks described from time to time in Equinix filings with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
