and deemed filed pursuant to Rule 14a-12  
of the Securities Exchange Act of 1934**

**Subject Company:  
Switch & Data Facilities Company, Inc.  
(Commission File No. 001-33302)**

#### **Overall Messaging and Rationale for the Deal**

- The Switch and Data deal will allow Equinix to extend its industry leadership as the #1 Global Colocation Data Center Services Provider.
- The deal also allows Equinix to accelerate its market momentum and global reach by gaining additional depth in the North American markets, growing its presence from 6 to 22 markets and leveraging the combined global service delivery platform for customers of both companies. The current data center supply and demand imbalance requires that Equinix satisfy global demand both organically and through strategic acquisition.
- The Switch and Data deal expands both the number of networks that customers can leverage for interconnection to more than 400 networks and also significantly enhances Equinix's domestic footprint to include key new North American markets including Atlanta, Denver, Miami, Seattle and Toronto.
- Both companies have an extraordinary commitment to customer care to meet the need for increased performance in terms of reliability and network latency. This customer-driven approach requires continued investment in existing services and new markets which may be leveraged through an integrated global expansion plan. The Switch and Data deal is the perfect proofpoint of Equinix's commitment to its customers and to service their desire for more data center capacity and presence in more markets.
- In addition, the acquisition helps the companies' customers respond to two broad market trends. The rapid growth of demand for online information is requiring companies to store and distribute larger volumes of latency sensitive assets and applications at the network edge, near local population centers. At the same time, the market compels companies to develop global aggregation and distribution strategies for their digital assets and applications. The transaction is expected to give Equinix customers broader access to local markets for their network edge deployments, and Switch and Data customers a comprehensive solution to their global data center needs.
- Equinix's disciplined expansion plan can be accelerated for customers of both companies to better leverage the joint inventory available and to provide an integrated set of worldwide services for future data center builds that can meet customers' growing global needs for capacity, increasing power and more interconnection choices.
- Lastly, the consolidated company may provide significant benefits in terms of increased shareholder value through continued revenue and adjusted EBITDA growth and synergy opportunities that benefit customers and shareholders alike.

#### **Growth and Scale:**

- Entry into new markets:
  - Core Colocation & Interconnection Markets: Atlanta, Denver, Miami, Seattle, and Toronto are particularly attractive markets for Equinix expansion to meet core internet growth requirements for our customers
  - In addition, the acquisition helps Equinix's customers respond to two broad market trends through 16 new markets:
    - Rapid demand growth for the distribution of latency sensitive applications and content at the network edge near local centers

- Developing global aggregation and distribution strategies for customers' digital assets and applications that are driven by network centric applications for their customers e.g. wireless intelligent phones and their data centric applications
- Additional Capacity in Existing markets:
  - NYC, Silicon Valley and Dallas (in particular)
  - Access to additional inventory in existing markets, new builds underway
  - Switch and Data sites offer opportunity for additional expansion

**Strategic Fit:**

- Business and financial models –
  - Added capacity, scale and new customers on top of Equinix's global investments
- Predominantly recurring revenue with strong customer relationships
- Focus on colocation (not management services or selling bandwidth) helps reduce integration risk
- Ecosystem development (Network & Content, Financial Services and Enterprise)
- Good cultural fit between companies

**Customer benefits:**

- Global Presence
- Continued focus on core business (no distractions of new offerings)
- Both companies are committed to overall customer experience
- Added investment capacity from Equinix
- More markets (both customer sets) to support new markets for data center expansion, network diversity and lower latency-sensitive applications
- High level of Equinix support/reliability, single support/process

**Important Information for Investors and Shareholders**
