Item 2.02. Results of Operations and Financial Condition

On April 28, 2021, Equinix, Inc. ("Equinix") issued a press release and will hold a conference call regarding its financial results for the first quarter ended March 31, 2021. A copy of the press release is furnished as Exhibit 99.1 to this report.

This information shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such a filing.

Equinix is making reference to certain non-GAAP financial information in both the press release and the conference call. A reconciliation of these non-GAAP financial measures to the comparable GAAP financial measures is contained in the attached press release.

Equinix Reports First Quarter 2021 Results

World's Digital Infrastructure Company™ Exceeds Expectations and Delivers Another Consecutive Quarter of Revenue and Interconnection Growth

REDWOOD CITY, Calif., April 28, 2021 /PRNewswire/ --

- Quarterly revenues increased 10% over the same quarter last year to \$1.596 billion, or 7% on a normalized and constant currency basis, representing
 the company's 73rd consecutive quarter of revenue growth
- · Became the market leader in retail colocation in all three regions of the world, taking the number-one spot in Asia-Pacific for the first time
- 2021 is set to be one of the most active build years ever, with 36 major projects underway across 28 markets and 19 countries

Equinix, Inc. (Nasdaq: EQIX), the world's digital infrastructure company, today reported results for the quarter ended March 31, 2021. Equinix uses certain non-GAAP financial measures, which are described further below and reconciled to the most comparable GAAP financial measures after the presentation of our GAAP financial statements. All per share results are presented on a fully diluted basis.

First Quarter 2021 Results Summary

Revenues

- \$1.596 billion, a 2% increase over the previous quarter
- Includes a \$6 million negative foreign currency impact when compared to prior guidance rates

. Operating Income

• \$298 million, a 30% increase over the previous quarter and an operating margin of 19%

Adjusted EBITDA

- \$773 million, a 48% adjusted EBITDA margin, due to strong operating performance including lower than expected utilities and repairs and maintenance expenses
- Includes a \$3 million negative foreign currency impact when compared to prior guidance rates
- Includes \$4 million of integration costs

. Net Income and Net Income per Share attributable to Equinix

- \$156 million, a 207% increase over the previous quarter, primarily due to strong operating performance and lower acquisition and debt redemption costs
- \$1.74 per share, a 205% increase over the previous guarter

· AFFO and AFFO per Share

- \$627 million, a 21% increase over the previous quarter
- \$6.98 per share, a 21% increase over the previous quarter
- Includes \$4 million of integration costs

2021 Annual Guidance Summary

Revenues

- \$6.559 \$6.619 billion, an increase of 9 10% over the previous year, or a normalized and constant currency increase of 7 8%
- An underlying full-year guidance raise of \$40 million offset by a \$61 million negative foreign currency impact

Adjusted EBITDA

- \$3.071 \$3.131 billion, a 47% adjusted EBITDA margin
- An underlying full-year guidance raise of \$33 million partially offset by a \$29 million negative foreign currency impact
- Assumes \$30 million of integration costs

• AFFO and AFFO per Share

- \$2.413 \$2.463 billion, an increase of 10 13% over the previous year, or a normalized and constant currency increase of 10 12%
- An underlying full-year guidance raise of \$26 million offset by a \$26 million negative foreign currency impact
- \$26.73 \$27.28 per share, an increase of 8 10% over the previous year, or a normalized and constant currency increase of 9 11%
- Assumes \$30 million of integration costs

Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income (loss) from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant.

Equinix Quote

Charles Meyers, President and CEO, Equinix:

"We had a great start to the year, and as businesses continue to navigate towards a post-pandemic world, Equinix is uniquely well-positioned. Digital transformation continues to accelerate, and businesses across a broad range of verticals are recognizing that their infrastructure can be a key source of competitive advantage in an increasingly digital world. Q1 also marked a milestone for Equinix as we are now the market leader in retail colocation in all three regions of the world, taking the number-one spot in Asia-Pacific for the first time. Demand is strong with global IT spend expected to rebound above pre-pandemic levels as enterprises increase hybrid cloud spending, and service providers build out their delivery platforms to tap into this demand."

Business Highlights

- In Q1, Equinix delivered one of the strongest net bookings quarters in the company's history, with more than 4,300 deals across more than 3,200 customers, and the lowest churn in many years.
- Equinix continues to strengthen its leadership position in the cloud ecosystem through the company's more than \$3 billion xScale™ program, which is expected to develop over 290 megawatts of power capacity for hyperscale customers across its first two off-balance sheet joint ventures. In Q1, Equinix announced the construction of the first building of its DB5x campus in Dublin, Ireland, which is 100% pre-leased to a major hyperscaler and is expected to be added to a current or future joint venture.
- Interconnection revenues grew in Q1 16% year-over-year, or 13% on a normalized and constant currency basis, and Equinix added more than 6,700 net interconnections more than its next 10 competitors combined bringing the company's total interconnections to over 398,000.
- Equinix continues to invest in its platform services, introducing new product capabilities and expanding market availability, helping enable the consumption of digital infrastructure and accelerating digital transformation for new and existing customers. In Q1, Equinix announced the expansion of Equinix Metal™, including availability in 18 global metros, the addition of new networking features to support hybrid multicloud architectures, the certification of new software integrations, and the launch of a Managed Appliance as a Service solution. With these new and enhanced capabilities, Equinix Metal customers can consume interconnected infrastructure with the control of physical hardware and the low overhead and developer experience of the cloud.

- Equinix continues to advance the company's sustainability agenda with meaningful progress across environmental, social and governance (ESG)
 initiatives:
 - On <u>January 21</u>, Equinix announced that it has joined the European Climate Neutral Data Center Pact, committed to ensuring data centers in Europe are carbon neutral by 2030.
 - On <u>February 25</u>, Equinix issued its inaugural green bonds in Europe to help advance the company's longstanding commitment to sustainability leadership and reducing its environmental impact.
 - Equinix also recently received an A- score for its CDP Climate Change Survey, a leading environmental rating system focused on climaterelated transparency and action, recognizing the company's contribution to helping advance the development of the nation's green power market, and its commitment to reach 100% clean and renewable energy across its portfolio.
- Equinix's financial strength remains a significant and strategic advantage. Today, S&P Global Ratings upgraded Equinix to BBB, highlighting industry
 fundamentals and the company's strong competitive position through its unique interconnection platform.

COVID-19 Update

Many of Equinix's International Business Exchange™ (IBX ®) and xScale data centers have been identified as "essential businesses" or "critical infrastructure" by local governments for purposes of remaining open during the COVID-19 pandemic, and all data centers remain operational at the time of filing of this press release. Precautionary measures have been implemented during the COVID-19 pandemic to minimize the risk of operational impact and to protect the health and safety of employees, customers, partners and communities.

Looking ahead, the full impact of the COVID-19 pandemic on the company's financial condition or results of operations remains uncertain and will depend on a number of factors, including its impact on Equinix customers, partners and vendors and the impact on, and functioning of, the global financial markets. The company's past results may not be indicative of future performance, and historical trends may differ materially. Additional information pertaining to the impact of the COVID-19 pandemic on Equinix and the company's response thereto will be provided in the upcoming Form 10-Q for the quarter ended March 31, 2021.

Business Outlook

Equinix widened its quarterly revenue guidance range to take into account certain large, anticipated non-recurring revenues. For the second quarter of 2021, the Company expects revenues to range between \$1.630 and \$1.660 billion, an increase of 2 - 4% quarter-over-quarter, or a normalized and constant currency increase of approximately 3 - 5%. This guidance includes a \$15 million negative foreign currency impact when compared to the average foreign currency ("FX") rates in Q1 2021. Adjusted EBITDA is expected to range between \$769 and \$789 million. Adjusted EBITDA includes an \$8 million negative foreign currency impact when compared to the average FX rates in Q1 2021 and \$9 million of integration costs from acquisitions. Recurring capital expenditures are expected to range between \$40 and \$50 million.

For the full year of 2021, total revenues are expected to range between \$6.559 and \$6.619 billion, a 9 - 10% increase over the previous year, or a normalized and constant currency increase of 7 - 8%. This updated guidance includes a raise of full-year revenues by \$40 million due to better-than-expected operating business performance, offset by a negative foreign currency impact of \$61 million when compared to the prior guidance FX rates. Adjusted EBITDA is expected to range between \$3.071 and \$3.131 billion, an adjusted EBITDA margin of 47%. This updated guidance includes a raise of full-year adjusted EBITDA by \$33 million due to better-than-expected revenues and lower operating costs, partially offset by a negative foreign currency impact of \$29 million when compared to the prior guidance FX rates, and includes an expected \$30 million of integration costs related to acquisitions. AFFO is expected to range between \$2.413 and \$2.463 billion, an increase of 10 - 13% over the previous year, or a normalized and constant currency increase of 10 - 12%. This updated guidance includes a raise of full-year AFFO by \$26 million due to strong business performance, offset by a negative foreign currency impact of \$26 million when compared to the prior guidance FX rates. AFFO per share is expected to range between \$26.73 and \$27.28, an increase of 8 - 10% over the previous year, or a normalized and constant currency increase of 9 - 11%. Non-recurring capital expenditures, excluding xScale related costs, are expected to range between \$2.125 and \$2.315 billion and recurring capital expenditures are expected to range between \$175 and \$185 million. xScale related on-balance sheet capital expenditures are expected to range between \$175 and \$185 million. xScale related on-balance sheet capital expenditures are expected to range between \$425 and \$475 million, which we anticipate will be reimbursed from both the current and future xScale JVs.

The U.S. dollar exchange rates used for 2021 guidance, taking into consideration the impact of our current foreign currency hedges, have been updated to \$1.17 to the Euro, \$1.33 to the Pound, S\$1.35 to the U.S. dollar, ¥111 to the U.S. dollar, and R\$5.67 to the U.S. dollar. The Q1 2021 global revenue breakdown by currency for the Euro, British Pound, Singapore Dollar, Japanese Yen and Brazilian Real is 20%, 10%, 7%, 7% and 2%, respectively.

The adjusted EBITDA guidance is based on the revenue guidance less our expectations of cash cost of revenues and cash operating expenses. The AFFO guidance is based on the adjusted EBITDA guidance less our expectations of net interest expense, an installation revenue adjustment, a straight-line rent expense adjustment, a contract cost adjustment, amortization of deferred financing costs and debt discounts and premiums, income tax expense, an income tax expense adjustment, recurring capital expenditures, other income (expense), (gains) losses on disposition of real estate property, and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items.

Q1 2021 Results Conference Call and Replay Information

Equinix will discuss its quarterly results for the period ended March 31, 2021, along with its future outlook, in its quarterly conference call on Wednesday, April 28, 2021, at 5:30 p.m. ET (2:30 p.m. PT). A simultaneous live webcast of the call will be available on the company's Investor Relations website at www.equinix.com/investors. To hear the conference call live, please dial 1-517-308-9482 (domestic and international) and reference the passcode EQIX.

A replay of the call will be available one hour after the call through Wednesday, July 28, 2021, by dialing 1-203-369-0926 and referencing the passcode 2021. In addition, the webcast will be available at www.equinix.com/investors (no password required).

Investor Presentation and Supplemental Financial Information

Equinix has made available on its website a presentation designed to accompany the discussion of Equinix's results and future outlook, along with certain supplemental financial information and other data. Interested parties may access this information through the Equinix Investor Relations website at www.equinix.com/investors.

About Equinix

Equinix (Nasdaq: EQIX) is the world's digital infrastructure company, enabling digital leaders to harness a trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Equinix enables today's businesses to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.

Non-GAAP Financial Measures

Equinix provides all information required in accordance with generally accepted accounting principles ("GAAP"), but it believes that evaluating its ongoing

operating results may be difficult if limited to reviewing only GAAP financial measures. Accordingly, Equinix uses non-GAAP financial measures to evaluate its operations.

Equinix provides normalized and constant currency growth rates, which are calculated to adjust for acquisitions, dispositions, integration costs, changes in accounting principles and foreign currency.

Equinix presents adjusted EBITDA, which is a non-GAAP financial measure. Adjusted EBITDA represents income from operations excluding depreciation, amortization, accretion, stock-based compensation expense, restructuring charges, impairment charges, transaction costs and gain or loss on asset sales.

In presenting non-GAAP financial measures, such as adjusted EBITDA, cash cost of revenues, cash gross margins, cash operating expenses (also known as cash selling, general and administrative expenses or cash SG&A), adjusted EBITDA margins, free cash flow and adjusted free cash flow, Equinix excludes certain items that it believes are not good indicators of Equinix's current or future operating performance. These items are depreciation, amortization, accretion of asset retirement obligations and accrued restructuring charges, stock-based compensation, restructuring charges, impairment charges, transaction costs and gain or loss on asset sales. Equinix excludes these items in order for its lenders, investors and the industry analysts who review and report on Equinix to better evaluate Equinix's operating performance and cash spending levels relative to its industry sector and competitors.

Equinix excludes depreciation expense as these charges primarily relate to the initial construction costs of a data center, and do not reflect its current or future cash spending levels to support its business. Its data centers are long-lived assets, and have an economic life greater than 10 years. The construction costs of a data center do not recur with respect to such data center, although Equinix may incur initial construction costs in future periods with respect to additional data centers, and future capital expenditures remain minor relative to the initial investment. This is a trend it expects to continue. In addition, depreciation is also based on the estimated useful lives of the data centers. These estimates could vary from actual performance of the asset, are based on historic costs incurred to build out our data centers and are not indicative of current or expected future capital expenditures. Therefore, Equinix excludes depreciation from its operating results when evaluating its operations.

In addition, in presenting the non-GAAP financial measures, Equinix also excludes amortization expense related to acquired intangible assets. Amortization expense is significantly affected by the timing and magnitude of acquisitions and these charges may vary in amount from period to period. We exclude amortization expense to facilitate a more meaningful evaluation of our current operating performance and comparisons to our prior periods. Equinix excludes accretion expense, both as it relates to its asset retirement obligations as well as its accrued restructuring charges, as these expenses represent costs which Equinix also believes are not meaningful in evaluating Equinix's current operations. Equinix excludes stock-based compensation expense, as it can vary significantly from period to period based on share price and the timing, size and nature of equity awards. As such, Equinix and many investors and analysts exclude stock-based compensation expense to compare its operating results with those of other companies. Equinix excludes restructuring charges from its non-GAAP financial measures. The restructuring charges relate to Equinix's decision to exit leases for excess space adjacent to several of its IBX data centers, which it did not intend to build out, or its decision to reverse such restructuring charges. Equinix also excludes impairment charges related to certain long-lived assets. The impairment charges are related to expense recognized whenever events or changes in circumstances indicate that the carrying amount of long-lived assets are not recoverable. Equinix also excludes gain or loss on asset sales as it represents profit or loss that is not meaningful in evaluating the current or future operating performance. Finally, Equinix excludes transaction costs from its non-GAAP financial measures to allow more comparable comparisons of the financial results to the historical operations. The transaction costs relate to costs Equinix incurs in connection with business combinations and formation of joint ventures, including advisory, legal, accounting, valuation and other professional or consulting fees. Such charges generally are not relevant to assessing the long-term performance of Equinix. In addition, the frequency and amount of such charges vary significantly based on the size and timing of the transactions. Management believes items such as restructuring charges, impairment charges, transaction costs and gain or loss on asset sales are non-core transactions; however, these types of costs may occur in future periods.

Equinix also presents funds from operations ("FFO") and adjusted funds from operations ("AFFO"), both commonly used in the REIT industry, as supplemental performance measures. Additionally, Equinix presents AFFO per share, which is also commonly used in the REIT industry. AFFO per share offers investors and industry analysts a perspective of Equinix's underlying operating performance when compared to other REIT companies. FFO is calculated in accordance with the definition established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents net income or loss, excluding gain or loss from the disposition of real estate assets, depreciation and amortization on real estate assets and adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items. AFFO represents FFO, excluding depreciation and amortization expense on non-real estate assets, accretion, stock-based compensation, restructuring charges, impairment charges, transaction costs, an installation revenue adjustment, a straight-line rent expense adjustment, a contract cost adjustment, amortization of deferred financing costs and debt discounts and premiums, gain or loss on debt extinguishment, an income tax expense adjustment, recurring capital expenditures, net income or loss from discontinued operations, net of tax and adjustments from FFO to AFFO for unconsolidated joint ventures' and non-controlling interests' share of these items. Equinix excludes depreciation expense, amortization expense, accretion, stock-based compensation, restructuring charges, impairment charges and transaction costs for the same reasons that they are excluded from the other non-GAAP financial measures mentioned above.

Equinix includes an adjustment for revenues from installation fees, since installation fees are deferred and recognized ratably over the period of contract term, although the fees are generally paid in a lump sum upon installation. Equinix includes an adjustment for straight-line rent expense on its operating leases, since the total minimum lease payments are recognized ratably over the lease term, although the lease payments generally increase over the lease term. Equinix also includes an adjustment to contract costs incurred to obtain contracts, since contract costs are capitalized and amortized over the estimated period of benefit on a straight-line basis, although costs of obtaining contracts are generally incurred and paid during the period of obtaining the contracts. The adjustments for installation revenues, straight-line rent expense and contract costs are intended to isolate the cash activity included within the straight-lined or amortized results in the consolidated statement of operations. Equinix excludes the amortization of deferred financing costs and debt discounts and premiums as these expenses relate to the initial costs incurred in connection with its debt financings that have no current or future cash obligations. Equinix excludes gain or loss on debt extinguishment since it represents a cost that is not a good indicator of Equinix's current or future operating performance. Equinix includes an income tax expense adjustment, which represents the non-cash tax impact due to changes in valuation allowances and uncertain tax positions that do not relate to the current period's operations. Equinix excludes recurring capital expenditures, which represent expenditures to extend the useful life of its IBX and xScale data centers or other assets that are required to support current revenues. Equinix also excludes net income or loss from discontinued operations, net of tax, which represents results that are not a good indicator of our current or future operating performance.

Equinix presents constant currency results of operations, which is a non-GAAP financial measure and is not meant to be considered in isolation or as an alternative to GAAP results of operations. However, Equinix has presented this non-GAAP financial measure to provide investors with an additional tool to evaluate its operating results without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons of Equinix's business performance. To present this information, Equinix's current and comparative prior period revenues and certain operating expenses from entities with functional currencies other than the U.S. dollar are converted into U.S. dollars at a consistent exchange rate for purposes of each result being compared.

Non-GAAP financial measures are not a substitute for financial information prepared in accordance with GAAP. Non-GAAP financial measures should not be considered in isolation, but should be considered together with the most directly comparable GAAP financial measures and the reconciliation of the non-GAAP financial measures to the most directly comparable GAAP financial measures. Equinix presents such non-GAAP financial measures to provide investors with an additional tool to evaluate its operating results in a manner that focuses on what management believes to be its core, ongoing business operations. Management believes that the inclusion of these non-GAAP financial measures provides consistency and comparability with past reports and provides a better understanding of the overall performance of the business and its ability to perform in subsequent periods. Equinix believes that if it did not provide such non-GAAP financial information, investors would not have all the necessary data to analyze Equinix effectively.

Investors should note that the non-GAAP financial measures used by Equinix may not be the same non-GAAP financial measures, and may not be

calculated in the same manner, as those of other companies. Investors should, therefore, exercise caution when comparing non-GAAP financial measures used by us to similarly titled non-GAAP financial measures of other companies. Equinix does not provide forward-looking guidance for certain financial data, such as depreciation, amortization, accretion, stock-based compensation, net income or loss from operations, cash generated from operating activities and cash used in investing activities, and as a result, is not able to provide a reconciliation of GAAP to non-GAAP financial measures for forward-looking data without unreasonable effort. The impact of such adjustments could be significant. Equinix intends to calculate the various non-GAAP financial measures in future periods consistent with how they were calculated for the periods presented within this press release.

Forward-Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, risks to our business and operating results related to the COVID-19 pandemic; the challenges of acquiring, operating and constructing IBX and xScale data centers and developing, deploying and delivering Equinix products and solutions; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenues from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; risks related to our taxation as a REIT and other risks described from time to time in Equinix filings with the Securities and Exchange Commission. In particular, see recent and upcoming Equinix quarterly and annual reports filed with the Securities and Exchange Commission, copies of which are available upon request from Equinix. Equinix does not assume any obligation to update the forward-looking information contained in this press release.
